Subject: No Dewey Burdock mine

Hello Shea,

I'm writing to voice my opposition to the Proposed Dewey-Burdock uranium mine in the southern Black Hills. As a frequent visitor to the area as well as a previous resident I hope that such an enterprise as proposed by Powertech be halted and stopped. The most essential resource to the local economy- Water- should be protected from pollution. Especially from potentially radioactive pollution. There is no assurance that the water sources that feed Fall River (an asset the Hot Springs and all who visit there) will not be affected by this pollution. Please do not let yet another enclave of our most precious resource- pure fresh water, be polluted. I hope that you will help to protect the Black Hills in its entirety including the water that is in and under the them, for the sake of the local residents, visitors and the native tribes that hold the Black Hills sacred. Thank you,
